

BOTTLE TOP DISPENSER

BOTTLE TOP DISPENSER

Dispenser for accurate and rapid dispensing of small and large volumes directly from any original reagent bottle.

The precise bottle-dosing-apparatus without parallax errors in volume adjustment.

Six models within the range 0,1 ml to 100 ml.

Characteristic Features:

- Easy and reliable volume adjustment, protected against unintended alternation
- The double valve system preventing the out led tube from dripping avoids the hazard of aggressive reagents
- The precision cylinder made of high quality borosilicate glass and platinum-iridium
- The positive sealing piston is fully functional also in liquids which tend to crystallize
- The modular design enable easy maintenance and cleansing of the inner parts without using any tools
- As the dispenser is full autoclaveable it can be used for any kind of sterile media
- Each unit comes with 3 thread adaptors, 1 suction tube and 1 discharge cannula

| Cat. No. | Model | Volume Setting μ l | Subdivision ml | Accuracy % | Precision % |
|----------|-------|------------------------|----------------|------------|-------------|
| 8.1. | D1 | 0,1 - 2,5 | 0,05 | 0,6 | 0,1 |
| 8.2. | D2 | 1,0 - 5,0 | 0,10 | 0,5 | 0,1 |
| 8.3. | D3 | 2,0 - 10 | 0,25 | 0,5 | 0,1 |
| 8.4. | D4 | 5,0 - 25 | 0,50 | 0,5 | 0,1 |
| 8.5. | D5 | 10,0 - 50 | 1,00 | 0,5 | 0,1 |
| 8.6. | D6 | 20,0 - 100 | 2,00 | 0,5 | 0,1 |
