

DIGITAL BURETTE

Burette DB

The burette for highest demands of modern titration practice.
Internal memory stores up to 500 measuring values of serial titration.

Covering range up to 99,99 ml

Push button selection for either titration or dispense function.

Characteristic Features:

- Simple, fatigue free operation
- Precision better than 0,1%, accuracy 0,2%
- Continuous dispensing technique for rapid titration
- First class material: Iridium, Platinum, Borosilicate glass and PTFE
- Independent of mains 300 hours, solid mechanism, compact electronic
- Refilling and air purging performance without loss of reagent
- The DB work fast, because the operator himself controls the velocity of the piston stroke
- Comes with accessories: suction tube, ejection tube, adaptor GI 45/32 and battery charger

Cat. No. 9.1. - Digital Burette DB
